

CSC 231 - Assignment #3

(1) Write a program that asks the user to enter a password and verifies if the password meets the following criteria:

- The password should be at least 7 characters long
- The password should contain at least one uppercase letter
- The password should contain at least one lowercase letter
- The password should contain at least one digit

Display a message indicating whether the password is valid or not.

[15 points]

(2) Write a program that accepts a string from the user and displays the number of words it contains. Also display a copy of the string with the first letter of each word capitalized.

(For example, if the string is “one two three four five”,

number of words = 5

string with first letter of each word capitalized = “One Two Three Four Five”.)

[15 points]
